SUMMARY

Software Engineer with 5+ years of deep experience in Backend Development, Distributed Systems, and Cloud Computing. Proficient in solving complex problems, I specialize in creating robust systems that power scalable and reliable applications.

SKILLS

Programming Languages and Frameworks: Go, Node.js, TypeScript, JavaScript, C#, Gin, React, Next.js, NestJS, Express.js, .NET

Messaging and Streaming: REST, gRPC, GraphQL, RabbitMQ, NATS, AWS Lambda, SQS, EventBridge

Data Stores: Amazon S3, PostgreSQL, MySQL, MSSQL, MongoDB, DynamoDB, Redis

Containerization and Orchestration: Docker, Kubernetes

DevOps and Cloud Infrastructure: AWS, Azure, Terraform (Infrastructure as Code), Git, Bash Scripting

Additional Skills: Microservices Architecture, Event-Driven Systems, API Design, Data Modeling

EXPERIENCE

Enpal

Berlin, Germany

Software Engineer

Sep 2025 - Present

- I'm building internal platforms to support teams and writing tooling to enforce good engineering practices.
- I led observability improvements, utilizing Datadog alerts for immediate visibility and faster incident response.
- Implemented an AI agent integration for automated outbound calling and appointment scheduling, processing 7K+ calls daily

EukaPay

Toronto, Canada (Remote)

Senior Software Engineer

Apr 2024 - Jul 2025

- Collaborated with a cross-functional team to develop and maintain a robust Payment Processor.
- Served as the primary code reviewer for the team because of my deep product knowledge and attention to detail.
- Designed and developed Microservices-based Systems for an on-ramp/off-ramp SaaS platform, enabling scalable, independent Service Deployments.
- I was the most significant contributor to the transformation of our Payment Processing System into an Event-driven Architecture, and established Asynchronous Communication with AWS Lambda & SQS for high concurrency with zero downtime.
- Led the Partners' platform development to accelerate merchant onboarding and boost product adoption, resulting in over 400% increase in transaction volumes.
- Automated CI/CD for Serverless Functions on AWS Lambda using Terraform & GitHub Actions, configuring EventBridge for decoupled workloads.
- Streamlined the onboarding process for new engineers, cutting ramp-up time by 50%.

Software Engineer

May 2022 - Mar 2024

- Built an advanced risk management compliance solution to monitor all platform transactions, which cut Money Laundering and Fraud risks by 95%.
- Reduced latency by 90% and eliminated deadlocks in production environments via thorough Database Modeling and Query Optimization.
- Engineered a secure webhook feature for real-time payment notifications, enhancing merchant API integration and improving customer satisfaction.
- I played a pivotal role in creating and documenting the EukaPay API with idempotency and security measures for seamless third-party programmatic interaction with our products.

Clevadev

Lagos, Nigeria

Co-founder / Software Engineer

Aug 2021 - Apr 2024

- I managed a fully remote, distributed team of 5 developers, product managers, and UI/UX product designers, expertly communicating and driving project execution throughout the Software Development Lifecycle (SDLC).
- Delivered modern mobile and web solutions for global clients, focusing on scalable architectures and best coding practices, resulting in a remarkable 90% client satisfaction rate.
- Optimized web development processes by applying Agile methodologies and promoting teamwork, which increased project completion rates and ensured timely delivery.
- Accelerated development cycles by 30% through consistent feedback loops and precise requirements gathering with clients.

Apex Network

Lagos, Nigeria

Mobile Developer

Oct 2021 - May 2022

- Built and maintained a cross-platform Flutter mobile application for cryptocurrency and gift card trading, enhancing user engagement and retention.
- I successfully deployed the iOS and Android mobile applications to the App Store and Google Play Store, respectively, achieving 2000+ downloads within the first month.
- Implemented shift-left testing approaches that improved application reliability and reduced bugs by an impressive 50%.

Fiverr

New York, USA (remote)

Freelance Full-Stack Developer

May 2020 - Jan 2022

- I did a lot of real work on Fiverr, including developing and delivering full-stack applications to global clients, achieving a remarkable 5/5 client satisfaction rate, and fostering long-term business relationships.
- Completed over 30 software development gigs utilizing M.E.R.N stack, Flutter, and Python, showcasing my versatility and expertise across various tech stacks.
- Attained Level One Seller status with an average rating of 5 stars.

EDUCATION AND CERTIFICATIONS

Amazon Web Services (AWS)

Jun 2024

AWS Certified Developer

AWS Certified Solutions Architect

Udacity

California, USA (Remote)

Cloud DevOps Engineer Nanodegree Program

Graduation Date: Sep 2022

Federal University of Technology, Owerri

Imo, Nigeria

Bachelor of Engineering in Mechanical Engineering

Graduation Date: Nov 2019
